

Super-Light E-150

A new Black-Light with high intensity & longer operating life!

E-150 is equipped with a new halation eliminated filter which eliminates 99% obstacle visible light. This brings an improvement of work environment and inspection accuracy.

- **High intensity and unnecessary dark room.**

The inspection can be carried out under visible light of 100lx.
It offers an intensity of $8,400\mu\text{W}/\text{cm}^2$ (Center portion) at 800mm off the filter.

- **Longer operating life with light controlling function.**

It can be kept an intensity of $5,000\mu\text{W}/\text{cm}^2$ (Center portion) for about 3,000 hours ^{*1} (at 800mm off the filter) by using the dimmer.

- **The distance between lights can be wider.**

In the case that there is necessity to line up two or more E-150, the distance between lights can be wider due to its high power output.
In the case that the distance is 1000mm, the intensity at the center will be $8,000\mu\text{W}/\text{cm}^2$ (at 800mm off the filter)

- **UV radiation distributing feature.**

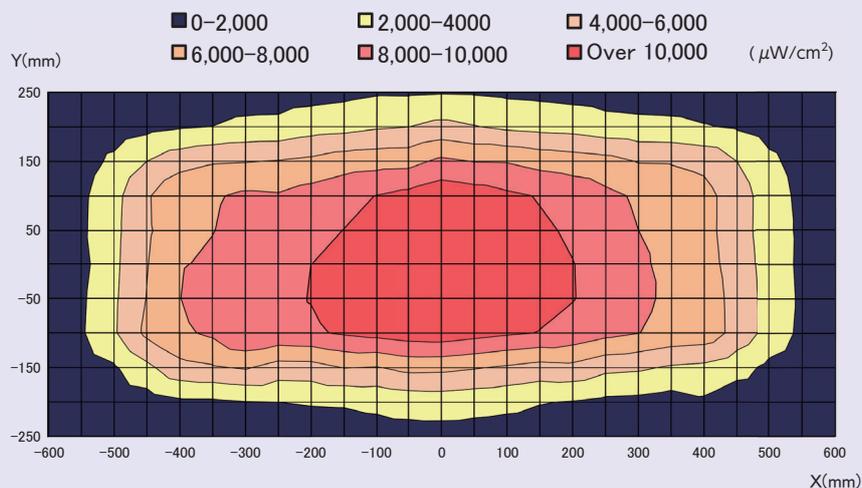

The UV radiation distribution does not change much even the radiation distance is changed since UV radiation always goes parallel.

- **Halation elimination.**

Halation eliminated filter eliminates the obstacle visible light (especially red and purple) effectively for better observation.

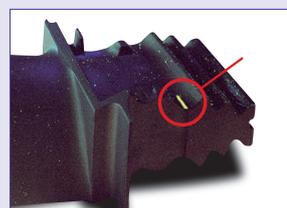

^{*1} Not guaranteed

UV Radiation Distribution (Ex.)

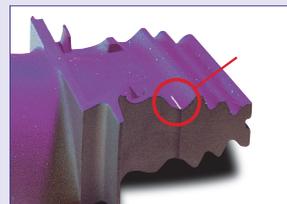

* Typical distribution at 800mm off the filter.

Fluorescent Inspection Observation (Effectiveness of the Halation eliminated filter)

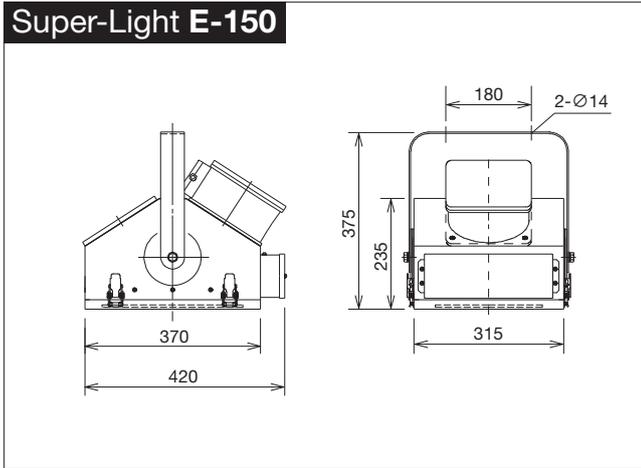

With halation eliminated filter

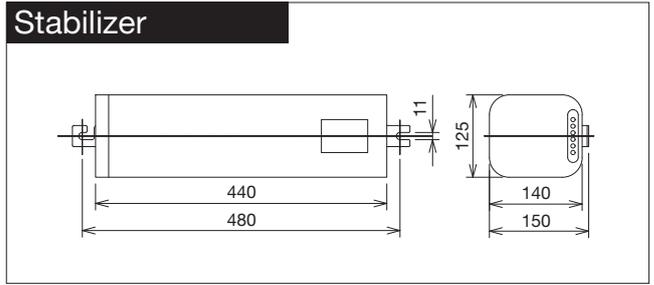

Without halation eliminated filter

■ Specification

| Model | E-150 |
|-----------------------------------|---|
| Type | Stationary type |
| UV Intensity *1 | At 800mm off the filter : 8,400 μ W/cm ² *2 |
| In case line up two or more E-150 | Distance 1,000mm/At 800mm off the filter : 8,400 μ W/cm ² |
| UV Radiation distributing feature | At its center of distribution |
| Input voltage | AC200V/220V \pm 10% |
| Power consumption | 1.2KW Maximum |
| Lamp | 1,200W metal halide lamp |
| Lamp life *1 | Approx.3,000 hours (At 800mm off the filter : 5,000 μ W/cm ²) |
| Time to be steady state | Approx. 5 minutes |
| Main wavelength | UV365nm (UVA) |
| Cooling fan | Mounted on the lamp body |
| Lamp body dimension | 420W \times 315D \times 235H(mm) |
| Lamp body weight | Approx. 15.0kg |
| Stabilizer dimension/weight | 440W \times 125D \times 140H(mm) / Approx. 23.0kg |
| Dimmer dimension/weight | 100W \times 220D \times 200H(mm) / Approx. 4.0kg |
| Option | Flange for duct |

*1 Not guaranteed *2 at 800mm off the filter
