Announcement of Production Base Change of Water-based Flaw Detection Agents

Dear Sirs:

We wish to express our gratitude for your continued prosperity. Thank you very much for your continued patronage of our products.

We are now planning to change the production base of our water-based flaw detection agents produced at our group factory. We apologize for any inconvenience due to this change, but we appreciate your understanding and cooperation.

1. Subject Products

- (1) Eco-Glo Fluorescent Penetrant EG-200
- (2) Super-Check Dye Penetrant P-LK
- (3) Super-Check Dye Penetrant P-LK / S
- (4) Super-Check Dye Penetrant UP-GIII / W
- (5) Super-Magna Dispersant BC-700

2. Reason for Change

Because of the review and reorganization of production bases within our company and our group.

3. Content of Change

Production base	[Present]	[After change]
	Marktec China Corporation	Marktec Corporation, Narita factory

- * Part of the label description (country of origin) will be changed.
- * The specification of the container will be partially changed (same as the specification for domestic products). Refer to the exhibit.
- * There will be no change in the product quality, components, inspection method, etc.

4. Timing of Change

We plan to switch production from April 2018 sequentially. As for the timing of shipments, please note that it will be switched after the end of the stock.

Exhibit

MARKTEC Corporation
