Change of Safety Information of Our Products Due to Change of Raw Material Component
Information

Dear Sirs:

We wish to express our gratitude to you for your continued and special consideration. Recently, we received new information on the components of the raw materials used for our penetrants. For this reason, we would like to inform you of the safety information provided by us because it has also changed. We apologize for any inconvenience due to this change, but we appreciate your understanding and cooperation.

1. Content of Change and Reason

The component information of the major solvent used for our penetrants changed. For this reason, the safety information of the subject products will change. Please refer to the exhibit for the summary of the content of change, and refer to the SDS for details.

2. Subject Products

Super-Check Dye Penetrant	UP-GIII / N II
Super-Glo Fluorescent Penetrant	OD-2800N, OD-1800N, OD-2800II Aerosol Type 450, OD-2800II, OD-2900III, OD-2800III

3. Subject Information

SDS and label

4. Timing

From April 2018

5. Other

Change of the label will be implemented from production in April. Depending on the stock status, it may take time to implement the change.
