Announcement for Material Change of LY Conc Series

Thank you very much for your continued business. We would like to inform you that the component of our Eco Magna Fluorescent Magnetic Particle Concentrated Solution (LY Conc Series) will be partially changed for the purpose of environmental improvement as mentioned below.

Sincerely yours,

Note

1. Target products

- Eco Magna Fluorescent Magnetic Particle Concentrated Solution LY-10Conc.
- Eco Magna Fluorescent Magnetic Particle Concentrated Solution LY-20Conc.
- Eco Magna Fluorescent Magnetic Particle Concentrated Solution LY-20FConc.
- Eco Magna Fluorescent Magnetic Particle Concentrated Solution LY-30Conc.
- Eco Magna Fluorescent Magnetic Particle Concentrated Solution LY-40Conc.

2.Change point

Target product	Before	After
LY Conc Series	IPA:<1%	IPA:0%

In addition, SDS will be revised with this change.

3. Reason for change

IPA (Isopropyl alcohol) it is included in LY Conc Series as collaterally is no longer required due to a review of our raw material blending process.

4. Others

- It will be changed sequentially from production of May, 2020.
- There is no change in the standard value and certification.
- There is no change from the conventional quality because there is no change in the active ingredient.
