Notification regarding Specifications change of Aerosol Product

Dear Customer,

This letter is to inform you a specifications change of one of our aerosol products as described below. We ask for your understanding and cooperation in this matter.

Yours faithfully,
Marktec Corporation

1. Relevant Products

Super Check Color Contrast Penetrant UP-ST(J) Aerosol 450 Type

2. Reasons for Specification Change

The container for the relevant product has been changed to one with a lower gauge (the sheet thickness of the can body has been reduced), with the purpose of decreasing the environmental burden by reducing the volume of the container.

Pressure resistance presents no problems, as the container satisfies the requirements of not deforming at 1.3 MPa and not bursting at 1.5 MPa, as determined by law.

3. Content of Change to Specifications

The volume of the product will change as described below. The amount of the content of the container will not change.

Before change to specifications	After change to specifications
412.7 ± 7.0g	407.1 ± 6.7g

4. Shipping Period and Lot of Specification Change

From October 2015, changes will take effect from the following lot, when existing stock has been exhausted.

Specification Change Lot No.: 15 I 17
