

Dear Customers,

October 2025

MARKTEC Corporation

Quality Assurance Dept.

Notice of Change in Inspection Standard for Fluorescent Penetrant

We hope this letter finds you well and that your business continues to thrive. And sincerely appreciate your continued support and patronage.

We would like to inform that due to the replacement of measuring instrument, the flash point inspection standard for our product, “Eco Glo Fluorescent Penetrant EG-2000” will be revised as follows. Thanks a lot for your understanding and cooperation on this matter.

Sincerely,

Details

1. Applicable Product

Eco Glo Fluorescent Penetrant EG-2000

2. Reason for the change

Due to the replacement of aging Tag-Closed-Cup Flash Point Tester, differences in measurement levels have occurred. Therefore, we will ensure consistency with the previous tester and revise the flash point test standard in consideration of Japanese law.

3. Changes

The flash point inspection standard will be revised as follows:

Table 1: Flash point revision

Product name	Before	After
EG-2000	$73 \pm 3^{\circ}\text{C}$	$76 \pm 6^{\circ}\text{C}$

4. Other Information

- The change will be implemented sequentially starting with production from November 2025.
- There will be no difference on product quality due to this change.
- Should you have any questions, please contact your sales representative.
